DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification does not enable one skilled in the art to make and/or use the invention to perform the method steps as claimed, i.e. the statement in the specification of “[a]n extraoral devise can be similarly be prepared for reshaping cranial bones by inducing osteogenesis as cranial sutures” (page 16) is not adequate disclosure. The specification describes the device for realigning teeth, how to use the device, and method of realigning teeth, but it does not describe the claimed invention other than repeating the claimed language.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear what is meant by “in a direction lateral to the sutures” and “amount of osteogenesis”. It is unclear how cyclical forces applied to the cranial sutures (claim 7) is further limiting.

Art Unit: 3732

Conclusion

5. The examiner cannot reasonably ascertain how the claimed invention is operated due to the lack of description. The specification does not adequately explain the claimed method. The examiner's failure to apply prior art should not be construed as allowable subject matter. The prior art made of record after a preliminary search and not relied upon is considered relevant to applicant's disclosure. Fontenot (4,883,046), McLeod et al. (6,022,349), Remmler (5,993,448), and Remmler (5,147,358) are cited.
